Projects

React Single Page App – [Karmatic](#)

- Used React, NodeJS, Express, GraphQL, Styled Components, and JWT.
- Implemented state hooks to update data in real time without page reloads.
- Bcrypt used to secure user credentials.
- Created queries and mutations to retrieve and update the GraphQL DB.

Social Media Website – [Quacker](#)

- Worked with a group of 4 on individual Git branches with clean merges.
- Conceptualized, wireframed, developed, bug tested, and deployed in four days.
- Utilized MySQL, Nodejs, Session, Express, Handlebars, and Materialize.
- Lead front end design and implemented Handlebars on dashboard and single comment pages.

API Project – [Sunday Funday](#)

- Led our four person group and divided work between teammates.
- Researched many different open source API docs and ultimately chose the ones used in the project.
- Managed Git workflow and resolved merge conflicts.
- Back end lead, developing API fetch calls and page interactions.

Employment History

Banger's Sausage House and Beer Garden, Austin, TX

Server, Bartender, Expo, Assistant General Manager
October 2018 - February 2022

- Gained team leadership skills through managing a team of 40+ employees.
- Created weekly schedule for front of house staff and private events staff.
- Thrived in a fast paced, high volume destination beer garden in the heart of downtown Austin.
- Cultivated a teamwork based environment focused on a guest first experience.
- Led daily line-ups with staff and wrote detailed notes after each shift.

Theo's Pizza, New Orleans, LA
